(54) Title: **STERILE IN-SITU MICROCARRIER FORMING GELLED POLYMERIC DISPERSIONS AND PROCESSES TO MANUFACTURE THE SAME**

(57) Abstract: Wireless hands-free system with silent user signaling. Silent alerting capability is provided for any hands-free device (104, 204) that relies on a short-range, wireless connection to interface to a terminal (102, 202). The silent alerting action can be provided by any non-audible signaling mechanism (114, 216, 714), for example a vibrator or a light. A hands-free device establishes the short-range wireless connection with the communication terminal in question. When an alert message, such as for an incoming call, is received over the short-range wireless connection, the silent alerting action is produced in response to the alert message. The invention can find use in any wireless hands-free device, for example, a "Bluetooth" headset.
